

## **PAPEREX EVOLVES INTO COLOMBIER FINLAND AFTER NEW INVESTMENTS**

Nearly 17 years after Colombier Group completed its purchase of the company, Paperex Colombier OY will change its corporate name to Colombier Finland OY.

The company had been planning this name change along with other major strategy changes, including start-up of the new Bio-Barrier Coating Line. The company manufactures barrier coated packaging products for European consumption and trades forest products globally.

Asked about the business name change, the president of the Colombier Group Board, Henrik Björnberg, shared that this rebranding solidifies the identity of the company in Finland and reflects the importance of Colombier Finland to Colombier Group.

### **About COLOMBIER**

COLOMBIER is a family-owned international forest products company with processing operations in Spain, the Netherlands, Belgium, United Kingdom, Finland and Germany. COLOMBIER is represented through local sales offices across Europe. COLOMBIER uses various mobile and on-location equipment to reprocess reels and sheets. Colombier trades in forest products and represents several paper producers in various markets.

COLOMBIER'S customers include box plants, packaging converters, publishers, printers, merchants, retailers and paper and packaging producers worldwide

COLOMBIER is one of the largest forest products converting companies in Europe.

COLOMBIER is known as a pioneer in using new technologies and has an extensive network of mobile machinery for reel re-sizing and re-packaging.

COLOMBIER Barrier Coating creates a bio barrier against water, oil, grease and heat and can be used on most paper and board products.
